

### ABSTRACT

A golf course (100/200) comprising a series of tee-areas T(1) - T(18), each containing a golf tee and a series of green-areas G(1) - G(18), each containing a golf hole. The tee-areas and the green-areas defining a first set of sequential  
5 fairway paths F1(1) - F1(18) between each tee-area and a target green-area in a first direction. The tee-areas and the green-areas also defining a second set of sequential fairway paths F2(1) - F2(18) between each tee-area and a target green-area in a second opposite direction. A first golf game may be played along the first set of fairway paths (e.g., clockwise) and a second golf game may be played along  
10 the second set of fairway paths (e.g., counterclockwise).
